

SOMDOTTA SARKAR

Full Stack Developer (Freelance)

Remote (Berlin, Germany) | somdottas07@gmail.com | +49 1523 8433 675

Portfolio | GitHub | LinkedIn

Available from: 2nd week of August 2026

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building high-performance web and mobile applications and scalable microservices. Expert in Node.js, React, React Native, TypeScript, and MongoDB, with a proven track record of optimizing distributed systems and managing large datasets. Currently working as an independent freelancer, delivering projects for international clients across **India, Australia, Malta, and Germany**. Experienced in collaborating within international Agile teams to deliver user-centric solutions. Passionate about creator culture, gaming ecosystems, and mentor-driven leadership.

SKILLS

- **Backend & APIs:** Node.js, Express.js, TypeScript, MongoDB, gRPC, REST APIs, JWT, OAuth 2.0, PHP, Laravel, Python.
- **Frontend & Mobile:** React, React Native, Redux, Next.js, Vue.js, JavaScript (ES6+), HTML5, CSS3/SCSS.
- **Infrastructure & DevOps:** AWS, Microsoft Azure, Docker, Git/GitHub, CI/CD, Automated Testing (TDD), RSpec, Jest.
- **Tools & Process:** Jira, Figma, Slack, Agile/Scrum, Code Review, Pair Programming.

PROFESSIONAL EXPERIENCE

Freelance Software Developer | Remote — Clients across India, Australia, Malta & Germany

January 2025 – Present

- **International Client Portfolio:** Delivered freelance web and mobile projects for clients based in Australia and Malta, and independently for a client in Germany, sourced primarily through an India-based network — adapting to diverse market requirements, stakeholders, and time zones.
- **Current Projects (in production):** Building a mobile weather application for a Malta-based client, and a mobile application for an Australian company to track and manage stock/inventory and employee performance; both projects are in their final production stage.
- **Architecture & Cloud:** Designed and managed distributed cloud infrastructure on AWS and Azure, maintaining 99.9% uptime for global consumer-facing applications.
- **Security:** Implemented secure, modern authentication constructs using JWT, Claims, and OAuth 2.0 for complex API integrations.
- **Lifecycle Management:** Executed the full SDLC for diverse clients, transitioning legacy monoliths into modular, performant web solutions.

Junior Developer | Streamfog — Remote (USA)

April 2023 – February 2025

- **System Optimization:** Developed and optimized Node.js microservices, improving data ingestion speeds and reducing backend latency by 15% for large-scale datasets.
- **API Design:** Built and maintained RESTful APIs to support a high-traffic SaaS platform, ensuring seamless integration between React front-ends and MongoDB databases.
- **Cross-functional Collaboration:** Partnered with designers and product managers in Agile sprints to launch features for the creator/streaming community.

Frontend Developer | Alluvie — Remote (London, UK)

September 2021 – March 2023

- **Performance Engineering:** Engineered an interactive platform using TypeScript, focusing on browser compatibility and rendering optimization, leading to a 20% increase in user retention.
- **Technical Design:** Collaborated on technical design standards to ensure UI components were reusable, accessible, and performant across all devices.

Code Reviewer | Microverse — Remote

2021 – 2022

- Ensured technical quality and adherence to observability best practices by providing rigorous code reviews for distributed full-stack projects.

Technical Mentor & Educator | Various Platforms

2016 – Present

- Leveraged 8+ years of mentoring experience to inspire junior developers and break down complex concepts in distributed systems and software architecture.

KEY PROJECTS

- **NovelAquaTech** (IoT, Full Stack Web) — Ongoing maintenance and continuous upgrades for an IoT-based platform website; implemented feature and performance improvements that contributed to customer growth.
- **Malta Weather App** (React Native, Node.js) — Mobile weather application for a client based in Malta; currently in production.
- **Stock & Employee Performance Tracker** (React Native, Node.js, MongoDB) — Mobile application for an Australian company to track and maintain stock/inventory levels and employee performance metrics; currently in production.
- **User-Tracking** (Node.js, MongoDB, React Native) — Engineered a real-time data processing engine for location tracking across 3+ applications, focusing on query optimization and database scalability.
- **VistaCloud** (React, Node.js, Azure) — Developed a cohesive payment management platform with a focus on secure transaction handling and performant UI.
- **Streamfog** (React, Node.js, MongoDB) — Built core features for a creator-centric SaaS platform, streamlining the content creation journey through data-driven tools.

EDUCATION

- Remote Full Stack Web Development Program | Microverse (1,300+ hours of coding)
- Postgraduate Diploma in Computer Applications | NIELIT
- Master of Science in Botany | Vidyasagar University | (First Class Honors)

LANGUAGES

- English: Fluent
- German: A1 (Currently pursuing A2 certification)
